Experience

Trainee Software Engineer April 2026 – Present
National Polymer Group *Dhaka, Bangladesh*

- Developing and maintaining in-house ERP systems supporting manufacturing and nationwide sales operations.
- Redesigned order management workflows, eliminating manual processing steps and reducing order cycle time.
- Debugged and refactored legacy production code, resolving **10+ critical defects** and improving system reliability.

Education

BRAC University Jan. 2022 – Jan. 2026
*Bachelor of Science in Computer Science — CGPA: **3.74**/4.00 (High Distinction)* *Dhaka, Bangladesh*

- Awarded Vice Chancellor's List, Dean's List, and Merit Scholarship across multiple semesters.
- Relevant Coursework: DBMS, System Design, Machine Learning, Cloud Computing, Networking, Web Development

Projects

Should I Retake (Academic Analytics Platform) 2025
JavaScript, PDF.js, SheetJS Live | Code

- Built a client-side application to parse PDF/Excel grade sheets and compute CGPA with retake in real time.
- Implemented debounced updates and DOM caching to ensure smooth performance on low-end devices
- Scaled to **10,000+ monthly users** by eliminating backend dependency and enabling instant in-browser results.

Nirapod (Real-Time Civic Reporting Platform) 2025
Spring Boot, React, PostgreSQL, WebSocket Live | Code

- Implemented real-time communication using WebSockets, enabling live chat and instant status updates.
- Built secure authentication using JWT, OAuth2, and OTP verification with encrypted user data (BCrypt).
- Integrated location tracking and media uploads to support issue reporting with geospatial context.

ShikkhaDwar (Learning Management System) 2025
Flask, SQLAlchemy, PostgreSQL Live | Code

- Developed a role-based LMS supporting course management, student enrollment, and instructor workflows.
- Built quiz engine with auto-grading and implemented progress tracking for performance monitoring.

Easy Docker Installation (Automated Script) 2024
Bash, Linux Code

- Built a cross-distribution script to automate Docker installation by detecting right OS and executing workflows.
- Reduced manual setup time and configuration errors by **99%** across multiple Linux environments.

Open Source & Problem Solving

Open Source (tldr-pages, OpenTelemetry – Maintainer)

- Contributed **50+ merged pull requests** across repositories with **62,000+ combined GitHub stars.**
- Collaborated with global maintainers through code reviews, issue tracking, and PR workflows.
- Used Git and CI/CD pipelines (GitHub Actions) in distributed environments.

Problem Solving

- Solved **150+** problems on LeetCode & HackerRank, strengthening skills in SQL, data structures, dynamic programming, and graph algorithms.

Technical Skills

Languages: Python, Java, JavaScript, Bash | **Databases:** Oracle, PostgreSQL, MySQL | **Frameworks:** React, Spring Boot, Laravel, Flask | **Tools:** Git, GitHub Actions, Docker, Postman, Jira, Swagger | **Testing:** Selenium, k6, Unit Testing | **Systems:** Linux (CLI, Bash scripting)

Certifications

GitHub Foundations Certification (2024) — Validates Git workflows, collaboration, and repository management.
Postman API Fundamentals Student Expert (2025) — Demonstrates API design, testing, and automation skills.
