# Md Sakib Sadman Badhon

Mohammadpur, Dhaka | +8801533024584 | badhon495@gmail.com | badhon495.github.io | badhon495 | badhon495

## Summary

A Computer Science student with a **strong foundation in software development, software testing, and open-source contributions**. Demonstrated expertise in full-stack web development, automation, and cybersecurity through academic projects and professional experience. Proven ability to deliver practical solutions while maintaining excellence in academics.

## Education

**BRAC University** — Jan. 2022 – Jan. 2026
*Bachelor of Science in Computer Science — CGPA: **3.74**/4.00 (High Distinction)* — *Dhaka, Bangladesh*

- Awarded Vice Chancellor's List, Dean's List, and Merit Scholarship across multiple semesters
- Relevant Coursework: DBMS, System Design, Machine Learning, Cloud Computing, Netwroking, Web Development

## Experience

**Trainee Engineer** — April 2026 – Present
*National Polymer Group* — *Dhaka, Bangladesh*

- Design, develop, and maintain in-house software solutions supporting day-to-day business operations
- Debug and resolve issues across the codebase; troubleshoot application problems reported by users to improve reliability

**Open Source Maintainer & Contributor** — April 2025 – Present
*tldr-pages · OpenTelemetry* — *Remote*

- **tldr-pages** (60,000+ Stars): Localized command-line documentation into Bangla, improving Linux and Unix command accessibility for the Bengali developer community. **50+ PR merged** with CI/CD-validated tests and i18n best practices
- **OpenTelemetry** (800+ Stars): Translated observability framework documentation into Bangla; contributions merged via CI/CD-validated pull requests following i18n standards

## Projects

**ShikkhaDwar** — 2025
*Full-Stack, LMS Architecture, PostgreSQL* — Live Demo | Code

- Developed a full-stack LMS with YouTube-integrated lessons, multi-type auto-graded quizzes, progress tracking, and automatic certificate generation
- Architected role-based system for Students, Instructors, and Administrators with full authentication flow

**Network Intrusion Detection System** — 2024
*Python, Streamlit, Scikit-learn* — Live Demo | Code

- Achieved **95.68% accuracy** classifying network traffic as normal or anomalous using a Random Forest classifier with real-time confidence scoring

**Easy Docker Installation** — 2024
*Bash, Linux Automation, Docker* — Code

- Built a one-command shell script that auto-detects Linux distributions and installs Docker with the correct workflow
- Reduced setup time by **99%** and ensured compatibility across Ubuntu, Debian, CentOS, and Fedora using robust Bash automation

**Should I Retake** — 2025
*HTML5, CSS3, JavaScript, PDF.js, SheetJS* — Live Demo | Code

- Parses PDF/Excel grade sheets to detect retakeable and failed courses with real-time CGPA recalculation; scaled to **10,000+ monthly active users**, becoming one of the most-used academic tool on campus
- Engineered async file handling, complex data extraction algorithms, and one-click Excel export

**ParkIt** — 2025
*Laravel, PHP, MySQL* — Live Demo | Code

- Airbnb-style parking marketplace where homeowners list garages and users search, book, and manage reservations with email-based password reset

## Technical Skills

**Languages**: Python, JavaScript, Java, PHP, Bash, C, SQL, HTML/CSS, LaTeX, MATLAB
**Frameworks & Libraries**: React, Spring Boot, Laravel, TensorFlow, Pandas, NumPy, Matplotlib, Streamlit
**Databases**: PostgreSQL, MySQL, SQLite
**Tools & Platforms**: Docker, Git, GitHub Actions, Postman, Jira, Selenium, k6, Swagger
**Systems**: Ubuntu, Debian, Linux Mint — server setup, automation, monitoring, deployment, troubleshooting

## Certifications

**Google:** Cybersecurity Professional Certificate, IT Automation with Python, Data Analytics, 5-Day AI Agents Intensive
**Open Source:** Hacktoberfest Super Contributor 2025, Hacktoberfest 2023
**Other:** GitHub Foundations Exam, AI Prompt Engineer Level 1™ (AI CERTs), Postman API Fundamentals Student Expert, Introduction to Quantum Computing, FreeCodeCamp 2025 Summer Hackathon
