## Experience

**Trainee Software Engineer** April 2026 – Present

*National Polymer Group* *Dhaka, Bangladesh*

- Conducted exploratory testing on the in-house ERP system prior to release, identifying, documenting, and reporting **5+ defects** to the development team.
- Designed and implemented **8+ features** for the sales and office application, performing integration, regression and ad-hoc testing to identify **20+ defects**.
- Conducted functional and non-functional testing of the company's primary website and backend systems, identifying and reporting **10+ defects**, including a critical authentication vulnerability.

## Education

**Bachelor of Science in Computer Science** Jan. 2022 – Jan. 2026

*BRAC University* *Dhaka, Bangladesh*

- CGPA: **3.74**/4.00 (High Distinction)
- Awarded Vice Chancellor's List, Dean's List, and Merit Scholarship across **6 of 12 semesters**.
- Relevant Coursework: DBMS, System Design, Machine Learning, Cloud Computing, Networking, Web Development

## Projects

**Should I Retake (Academic Analytics Platform)** 2025

*JavaScript, PDF.js, SheetJS* Live | Code

- Built a client-side application to parse PDF/Excel grade sheets and compute CGPA with retake detection in real time.
- Manually tested parsing logic against varied grade sheet formats and edge cases, and validated performance across a range of screen sizes and processor/device types to ensure smooth, accurate results entirely client-side.
- Scaled to **10,000+ monthly users** by eliminating backend dependency and enabling instant in-browser results.

**ShikkhaDwar (Learning Management System)** 2025

*Flask, SQLAlchemy, PostgreSQL* Live | Code

- Developed a role-based LMS supporting course management, student enrollment, and instructor workflows.
- Manually tested the auto-grading quiz engine against varied answer combinations to confirm scoring accuracy.
- Conducted functional and non-functional testing across LMS modules, and performed regression testing after each new feature to verify existing functionality remained intact.
- Designed backend APIs and database models for scalable content and user management.

**Easy Docker Installation (Automated Script)** 2024

*Bash, Linux* Code

- Built a cross-distribution script to automate Docker installation by detecting OS and executing appropriate package workflows.
- Validated script reliability across multiple VM instances and installation scenarios (fresh installs, partial installs, three+ Linux distributions), eliminating manual troubleshooting steps required in prior manual setups.

## Open Source & Problem Solving

**Open Source**

*tldr-pages, OpenTelemetry – Maintainer*

- Contributed **50+ merged pull requests** across tldr-pages and OpenTelemetry; all contributions were validated against the projects' existing automated test and lint pipelines (markdownlint, tldr-lint, pytest, shellcheck) as part of standard PR review.
- Improved accessibility of developer documentation for Bangla-speaking users.

**Problem Solving**

- Solved **150+** problems on LeetCode & HackerRank, strengthening skills in SQL, data structures, dynamic programming, and graph algorithms.

## Technical Skills

**Testing:** Manual testing, test case design, defect reporting, regression testing | **Exposure to:** Selenium, k6, Postman
**Languages:** Python, Java, JavaScript, Bash | **Databases:** Oracle, PostgreSQL, MySQL
**Frameworks:** React, Spring Boot, Laravel, Flask
**Tools:** Git, GitHub Actions, Docker, Postman, Jira, Swagger | **Systems:** Linux (CLI, Bash scripting)

## Certifications

**Google Cybersecurity Professional Certificate** (2023) — Covers threat detection, Linux security, SQL, and incident response.
**GitHub Foundations Certification** (2024) — Validates Git workflows, collaboration, and repository management.
**Postman API Fundamentals Student Expert** (2025) — Demonstrates API design, testing, and automation skills.
**Google IT Automation with Python** (2024) — Focuses on Python scripting, automation, and troubleshooting for IT tasks.
