Experience

Trainee Software Engineer — Apr. 2026 – Present
National Polymer Group — *Dhaka, Bangladesh*

- Monitored and administered the production server (Oracle Linux, cPanel/Plesk) and **Oracle Database 19c/EBS**, performing log monitoring and troubleshooting outages to maintain uptime for **1,200+ users**.
- Provisioned a **staging clone** of the backend server, replicating services, packages, and cron jobs to validate changes before production deployment; performed post-deployment sanity checks and SQL-based data verification after releases.
- Wrote **Bash** automation scripts for backup and routine server maintenance, reducing manual operational overhead.
- Shipped **8+ features** across Sales/Office apps and cut Sales app size **35MB to 16MB**.
- Conducted functional and non-functional testing of the website and backend systems, identifying **10+ defects**, including a critical authentication vulnerability, and hardened server/network security (SSL/TLS, DNS, firewall).

Education

Bachelor of Science in Computer Science — Jan. 2022 – Jan. 2026
BRAC University — *Dhaka, Bangladesh*

- CGPA: **3.74**/4.00 (High Distinction)
- Awarded Vice Chancellor's List, Dean's List, and Merit Scholarship across **6 of 12 semesters**.
- Relevant Coursework: DBMS, Networking, System Design, Operating Systems, Cloud Computing

Projects

Should I Retake (Academic Analytics Platform) — 2025
JavaScript (ES6+), PDF.js, SheetJS, jsPDF, HTML5, CSS3 — Live | Code

- Built a zero-backend, privacy-first CGPA/grade-sheet analytics tool that parses official grade sheets in-browser, so **no student data leaves the device**; deployed on GitHub Pages, serving **3,000+ monthly users**.
- Engineered a fault-tolerant parser (parallel page extraction, coordinate-based line reconstruction, regex and word-level fallback) with domain rules for Repeat/Retake detection and real-time CGPA recalculation.

Easy Docker Installation (Cross-Distro Automation) — 2024
Bash, Linux, Systemd, Package Managers (apt/yum/dnf/zypper) — Code

- Built a one-command Bash installer that detects the Linux distribution via `/etc/os-release` and dispatches the correct setup routine, supporting **8 distros** (Ubuntu, Debian, CentOS, Fedora, Kali, Mint, LMDE, OpenSUSE).
- Automated the full provisioning workflow – old-package cleanup, repo/key setup, installation, and `hello-world` verification – **replacing 20+ manual commands**; published as a `curl | bash` one-liner.

ShikkhaDwar (Learning Management System) *(Team of 3)* — 2025
Flask, SQLAlchemy, PostgreSQL, Gunicorn, Render — Live | Code

- Architected a role-based LMS (student, instructor, admin) with **11 relational models** and **40+ endpoints** in modular Flask blueprints, using hashed credentials and ownership checks.
- Deployed and configured the Gunicorn/PostgreSQL stack on Render, managing environment config, database provisioning, and release process for the live service.

Open Source and Problem Solving

Open Source
tldr-pages, OpenTelemetry – Maintainer

- Contributed **50+ merged pull requests** across repositories with **62,000+ combined GitHub stars**.
- Collaborated with global maintainers via code reviews, issue tracking, and GitHub Actions CI/CD.

Problem Solving & Security

- Solved **150+** problems on LeetCode & HackerRank, covering SQL, Data Structures, Algorithms, and graph theory.
- Completed TryHackMe's **Advent of Cyber** (log analysis, OSINT, packet analysis, incident response) and competed in **Patriot CTF** (web security, cryptography, forensics).

Technical Skills

Monitoring & Logging: Log monitoring & rotation, incident escalation, exposure to ELK, Grafana, Prometheus, Zabbix |
Databases & SQL: Oracle Database **19c**, Oracle **EBS**, PostgreSQL, MySQL, SQL query writing, PL/SQL
Systems & Networking: Linux (Ubuntu, Debian, Oracle Linux), Bash scripting, subnetting, routing & switching, DNS, firewall/SELinux | **Automation & Scripting:** Bash, Python, cron, Git, GitHub Actions, Docker
Office & Reporting: Microsoft Excel (data analysis & reporting), CMS/ticketing workflows, UAT & smoke testing | **Other Tools:** Postman, Jira, Swagger, Selenium, k6

Certifications

Google Cybersecurity Professional Certificate (2023) — Covers threat detection, Linux security, SQL, and incident response.
GitHub Foundations Certification (2024) — Validates Git workflows, collaboration, and repository management.
Postman API Fundamentals Student Expert (2025) — Demonstrates API design, testing, and automation skills.
