EXPERIENCE

Trainee Software Engineer

April 2026 – Present

National Polymer Group

Dhaka, Bangladesh

- Maintained in-house Sales, Dealer, and Office applications used by **1,200+ users** across the organization.
- Redesigned the Sales app UX using newer, efficient packages, cutting size from **35MB to 16MB** and boosting speed up to **50%**.
- Shipped several new Sales app features, including conveyance bill submission, an analytics dashboard, and pause-order delivery.
- Migrated the Office app's Android build from React Native to Kotlin, reducing app size from **19MB to 5MB** via R8/ProGuard minification, resource shrinking, per-ABI APK splits, and deduped native libraries.
- Modernized the company website's legacy codebase, improving SEO performance and strengthening security.

EDUCATION

BRAC University

Jan. 2022 – Jan. 2026

Bachelor of Science in Computer Science — CGPA: **3.74/4.00** (High Distinction)

Dhaka, Bangladesh

- Awarded Vice Chancellor's List, Dean's List, and Merit Scholarship across multiple semesters.
- Relevant Coursework: DBMS, System Design, Machine Learning, Cloud Computing, Networking, Web Development

PROJECTS

Should I Retake (Academic Analytics Platform)

2025

JavaScript, PDF.js, SheetJS

[Live](#) | [Code](#)

- Built a client-side application to parse PDF/Excel grade sheets and compute CGPA with retake detection in real time.
- Engineered parallel PDF parsing using Promise-based processing and optimized text extraction with Map-based grouping, improving processing efficiency.
- Implemented debounced updates, DOM caching, and efficient data structures to ensure smooth performance on low-end devices
- Scaled to **10,000+ monthly users** by eliminating backend dependency and enabling instant in-browser results.

Dhikr (Tasbih / Dhikr Counter App)

2025

Kotlin, Jetpack Compose, Material 3, Room

[Download](#) | [Code](#)

- Built a fast, offline-first, ad-free native Android app with a tap-to-count engine, session tracking, and undo.
- Designed a dhikr library with custom Tasbih support, multi-step routines, daily goals, and insights with charts.
- Integrated optional AI-generated dhikr benefits via the Gemini API using a user-supplied, securely stored API key.
- Implemented reboot-persistent reminders, home screen widgets, and JSON backup/restore.

ShikkhaDwar (Learning Management System)

2025

Flask, SQLAlchemy, PostgreSQL

[Live](#) | [Code](#)

- Developed a role-based LMS supporting course management, student enrollment, and instructor workflows.
- Built quiz engine with auto-grading and implemented progress tracking for performance monitoring.
- Designed backend APIs and database models for scalable content and user management.

Easy Docker Installation (Automated Script)

2024

Bash, Linux

[Code](#)

- Built a cross-distribution script to automate Docker installation by detecting OS and executing appropriate package workflows.
- Reduced manual setup time and configuration errors by **99%** across multiple Linux environments.

OPEN SOURCE & PROBLEM SOLVING

Open Source

[tldr-pages](#), [OpenTelemetry](#) – Maintainer

- Contributed **50+ merged pull requests** across repositories with **62,000+ combined GitHub stars**.
- Improved accessibility of developer documentation for Bangla-speaking users.
- Collaborated with global maintainers through code reviews, issue tracking, and PR workflows.
- Used Git and CI/CD pipelines (GitHub Actions) in distributed environments.

Problem Solving

- Solved **150+** problems on LeetCode & HackerRank, strengthening skills in SQL, data structures, dynamic programming, and graph algorithms.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, Bash | **Databases:** Oracle, PostgreSQL, MySQL

Frameworks: React, Spring Boot, Laravel, Flask

Tools: Git, GitHub Actions, Docker, Postman, Jira, Swagger | **Testing:** Selenium, k6, Unit Testing

Systems: Linux (CLI, Bash scripting)

CERTIFICATIONS

Google Cybersecurity Professional Certificate (2023) — Covers threat detection, Linux security, SQL, and incident response.

GitHub Foundations Certification (2024) — Validates Git workflows, collaboration, and repository management.

Postman API Fundamentals Student Expert (2025) — Demonstrates API design, testing, and automation skills.

Google IT Automation with Python (2024) — Focuses on Python scripting, automation, and troubleshooting for IT tasks.
